Response to Amendment

1. Applicant's arguments filed 1-13-05 have been fully considered but they are not deemed to be persuasive.

In claim 11 line 2 after the recited "crosslinked polymer particle" there exist no structural representative of the composition of that which applicants are specifically arguing. According to applicants' arguments, the art of record demonstrates other maleimide moieties produced in the art which do not, however, contain the particular structure as claimed. . Noting specifically the art of record, USP 6410611, which discloses a maleimide derivative representative of formula (1)

Thus, although it is clear that the reference does not teach the particular composition as defined by the structure of applicants' claims 1-10, applicants claimed language in claim 11 is clearly not limited to such a structure or moieties.

However, with regard to applicants' claim 11, the reference does in fact disclose that the derivative may contain ethylene or polyethylene glycol units and although it is noted that those units are specifically depicted by the reference as being moieties

Art Unit: 1711

disclosed for the R₂ moiety and not that of a directed link to the imide moiety, applicants' broad claim language in claim 11 with out any structural content continues to read on such language . Note also that the reference notes that it is well-known that pendant type maleimides can be crosslinkable, although the particularly defined composition of the reference is not disclosed as such, neither is such structure defined by applicants' claim 11. With regard to applicants' process wherein the method comprises producing a maleimide group containing crosslinked polymer particle by reacting a hydroxymethylmaleimide with a hydroxyl group-containing polymer, it is noted that although the composition of the prior art may contain other derivatives derived from a hydroxymethylmaleimide

Consequently, as broadly defined, the claimed invention continues to not be deemed as novel and accordingly is unpatentable.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 11 is rejected under 35 U.S.C. 102(b) as being anticipated by USP 6410611 for reasons previously stated. See tables 2 and 4, cols. 1- 4, 6 , 16 and claims 1 and 4.

Art Unit: 1711

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Objected Claims

Claims 12-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
